⯈⯈ Main Feature

■ High Definition Voice Quality
Using a wideband speech codec (G.722[16KHz sampling]), audio during VoIP is transmitted in high quality, making conferences seem "face-to-face".

Headquarters
Branch

■ Full Duplex Acoustic Echo-Canceller
Owing to the latest echo cancelling technology, conversations are clearer than on analogue conference calls.

Other country
Germany

■ Easy to Carry & Setup
The KX-NT700 offers easy and smooth communications.

■ Speech Speed Conversion
Other parties are slowed to a loud and clear speaking speed by expanding audible segments and compressing inaudible segments without altering the overall duration of spoken tracts during conversation.

▼ **How the communication speed is changed**

Normal communication	Hello	Silent part	Hello	Silent part
	Sound part		Sound part	
When the communication speed is changed	H e l l o		H e l l o	

The total time length is about the same

■ Conference Recording with SD Memory card
Calls can be recorded on SD card. PCM (pulse code modulation) recording is used, making playback on PC simple and easy. Recording time depends on SD card capacity. (A 2GB card allows about 67 hours of recording.)

■ 3-Party Conferencing
KX-NT700 can simultaneously establish 1 IP channel and 1 analogue connection. And, on the IP connection, it can simultaneously connect to 2 channels for 3-party conferencing.

■ Relationship with Panasonic IP PBX (KX-TDE, NCP series)
The KX-NT700 operates as SIP extension of PBX and analogue extension.

■ Mic Noise Cut
By cancelling out ambient noise such as the drone of LCD projector fan, conversations are clear so conferences can proceed smoothly.

▼ **How noise reduction works**

Voice communication		Eliminating noise components	Clear voice communication
Environment noises Fan noise, etc.			

■ **SD Memory Card Slot**
Conversation and voice memos* can be recorded onto SD Cards.
